INTRODUCING NEW BRANDS

DUNAVOX WINE COOLING EXPERTS

DUNAVOX

In the space of a few years, Dunavox has become a leading player in the wine cooler market. Storing wine, especially at-home can prove to be problematic. A wine cooler is a practical and aesthetic appliance for wine storage. We offer a wide variety of coolers ranging from those with the capacity to store small, personal collections, to apparatus equipped to provide the necessary climate for larger collections. Some models are free-standing while others can be incorporated into your kitchen design. Our modern models are of standard sizes, incorporate electronic controls and pull-out drawers, all of which are a great advantage for built-in coolers. We also recommend professional, lockable models for vintners and caterers.

Dunavox is one of the fastest developing wine cooler brands on the market. A clear mission, streamlined organizational structure, powerful sales and service network all help to provide our clients with a wide range of quality products at reasonable prices.

NEFF APPLIANCES

Neff's Slide & Hide® system literally means that an oven door can be opened and seamlessly tucked away into an integrated compartment underneath the oven.

Ergonomic and easy to use courtesy of the Neff Revolution handle that rotates in your hand, it's a feature that's signature of the customer convenience logic that's at the heart of all Neff appliances and a philosophy of making cooking easier, safer and more pleasurable.

There's now an expanded choice of three different models in the Neff Slide & Hide® oven collection following the recent addition of Slide & Hide® with Vario Steam. Different models include an array of other exciting Neff innovative technologies and systems.
