IMPROVING QUALITY OF LIFE

For over forty years, Dorelan has been working with the awareness that a healthy sleep improves quality of life. Choosing the perfect bed, mattress and pillows can only be good news and it is precisely for this reason that Oxford House has introduced Dorelan Sleep Studio - a new concept store at their multi storey showroom in Mrieħel, Malta.

DORELAN PRODUCES THE FULL BED SYSTEM

Sleeping improves quality of life and for this reason must be personalized, that is to say, it must be able to satisfy the physiological characteristics of everybody's sleep. That is why Dorelan, aware of the different needs of its customers, produces all components - from beds to mattresses and bases, from pillows to accessories - offering for each one different versions to create your full bed system. From the bed design to the mattress technology, the bed system is conceived on the peculiarities and tastes of each single person for a correct and satisfying sleep.

THE QUALITY OF PRODUCTION PROCESSES

It is very important to choose a mattress designed for the maximum satisfaction of the customers. The mattress must be of high quality and meet definite and regulated standards. The quality of production processes is an essential value for Dorelan. This is why all Dorelan products are certified by important accredited organizations, attesting the ability of its quality system to meet customers' needs and assuring quality standards are met during all steps of production cycle.

TOP QUALITY MATERIALS

There is nothing more precious than children's health. Dorelan products are subjected to several strict tests to protect the health of children, who are vulnerable and need protection especially during their first years of life. Dorelan mattress lines have successfully obtained the Oeko-Tex Standard 100 Class 1 certification, which attests the very high quality and the materials healthiness so as to be used in direct contact with children from the age of 36 months.

Dorelan cooperate with important Italian research institutes and the best universities which, together with their laboratories, work with the aim of bringing scientific knowledge to the field of well-being, in order to sleep well and live better.

Dorelan products can be found at the Oxford House complex.

KITCHEN SINKS & MIXERS

GROHE Minta Touch

With its innovative EasyTouch technology, it instinctively reacts to the slightest touch.

One tap of the Minta Touch with the back of your hand, wrist or forearm is all it takes to turn it on or off.

Special promotional price:
€425.00

Foster Live the Quality

Foster takes good care to use materials able to provide the best performance.

The entire range is made with AISI 304 - (18/10) austenitic steels. Thanks to the high percentages of chrome and nickel they contain, they give a particular bright finish and are extremely sturdy and absolutely resistant to rust and corrosion.

We are now pleased to introduce a new range of kitchen sinks from Foster, please visit our showroom for further information.

Available on the **App Store** Foster app for I-Pad is now available in app store
